

### VCNT Selective Supplement (iS47062)

A selective supplement for the isolation of pathogenic *Neisseria*.

Industry: Clinical

### Description

A selective supplement designed for the isolation of pathogenic *Neisseria*. The antibiotic integrated into the medium, prevents the growth of nearly all non-pathogenic microorganisms present in the sample, including saprophytic *Neisseria* species.

### Content per Vial

1 Vial for 500 ml of culture medium.

Vancomycin	1.5 mg
Colistin Sulphate	3.75 mg
Nystatin	6250 IU
Trimethoprim	2.5 mg

### Directions

Add 5 ml of sterile distilled water to the vial's contents and gently mix until fully dissolved. Filter sterilize the solution and aseptically introduce it to 500 mL of sterile Thayer Martin Medium Base or GC Medium Base, cooled to 50 °C. Thoroughly mix the solution and pour it into Petri dishes.

### Storage

Store in a light-protected environment at -20°C.
